

Arjun is a **keen observer** and his curiosity always helps him build awareness and **understand the concepts better**.

He enjoys **Nature walk** and we have often seen him collecting different things from nature and **making connections with it**.

He enjoyed the Mock shop where he **demonstrated his understanding of reading the data** from the packet and making the payment accordingly.

His eagerness and energy is visible in the way he participates and **puts in effort** during Sports sessions.

Sensorial experiences helped him develop the understanding about the parts of a fish in depth and he enjoyed learning the same.

It was amazing to see him being **fully engrossed and engaged** in exploring different materials to create the feather for installation.
